

StyleVision – Graphical Stylesheet Designer

Altova® StyleVision® 2009 is an award-winning, graphical stylesheet designer for transforming XML, XBRL, and database content into HTML, RTF, PDF, Word 2007 (OOXML), and Authentic® electronic forms. StyleVision is standards-based and supports XSLT 1.0/2.0, XSL:FO, CSS, JavaScript, and all major relational databases. It is optimized for single source publishing, allowing multiple output styles from a single stylesheet design.

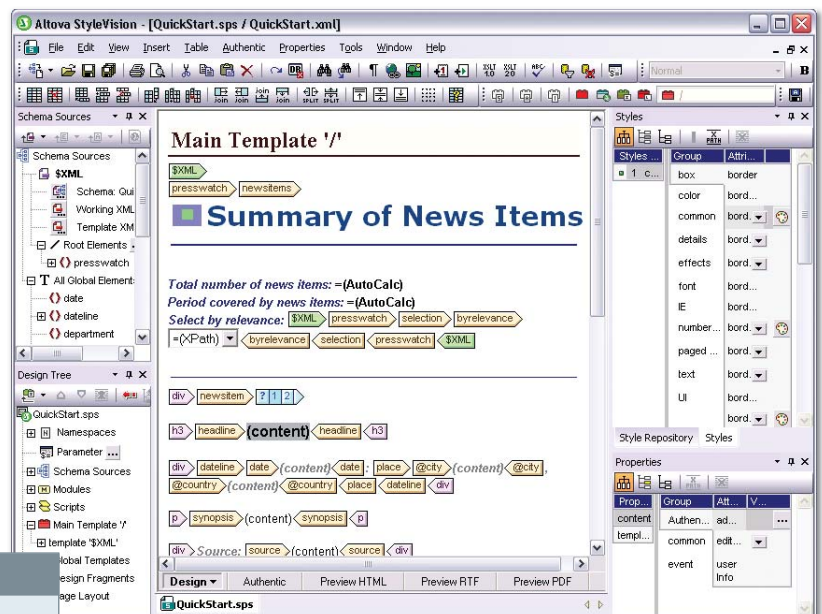

- Visual, drag & drop stylesheet design
- Publish XML, XBRL, and DB data in HTML, RTF, PDF, Word 2007, & Authentic e-Form formats
- Create stylesheets for XML Schema, DTD, XBRL & database data sources
- Graphically design XSLT 1.0 / 2.0 & XSL:FO stylesheets & view results
- Support for CSS & JavaScript
- Advanced functions for dynamic presentation
- Combine multiple XML / XBRL / DB sources in one design
- Database query window with SQL editor
- Support for industry standard templates (DITA, DocBook, etc.)
- Visual Studio & Eclipse integration
- And much more...

StyleVision's unique drag-and-drop design interface allows designers and developers to apply graphical designs to their data for publication to multiple formats. Advanced entry helper windows and intuitive functionality takes the complexity out of stylesheet design. Simply import an XML Schema/DTD, XBRL taxonomy, or database to define your document structure, as well as a sample data file, and StyleVision autogenerates standards-conformant XSLT and XSL:FO markup based on your visual representation, as well as the corresponding output in HTML, RTF, PDF, Word 2007 (OOXML), and Authentic electronic forms.

Supported databases:

- | | |
|---|--------------------------------|
| • Microsoft® SQL Server® 2000, 2005, 2008 | • Sybase® 12 |
| • IBM DB2® 8, 9 | • MySQL® 4, 5 |
| • IBM DB2 for iSeries® v5.4 | • PostgreSQL 8 |
| • Oracle® 9i, 10g, 11g | • Microsoft Access™ 2003, 2007 |

StyleVision Design Interface

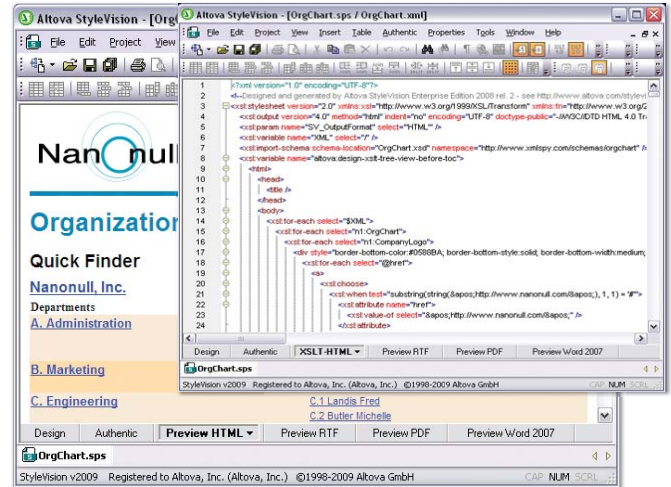

Visual Stylesheet Design

- Intuitive drag & drop interface
- Design based on XML, DTD, XBRL, and/or database source(s)
- Intelligent entry helpers
- User-defined templates
- CSS & JavaScript
- Advanced stylesheet functions

Single Source, Multi-channel Publishing

- Simultaneous output in:
 - HTML
 - RTF
 - PDF
 - Word 2007 (OOXML)
 - Authentic e-Forms
- View and save XSLT 1.0 / 2.0 and XSL:FO stylesheets

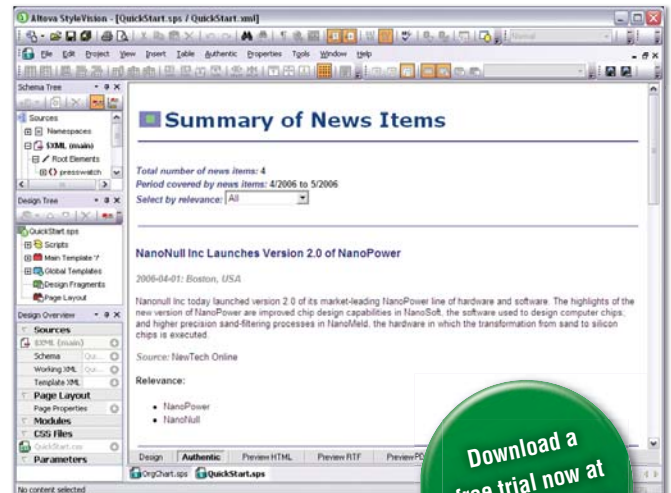

Authentic® – XML & Database Content Editor

e-Forms designed in StyleVision allow non-technical users to efficiently edit XML and DB data. Authentic is licensed free-of-charge and includes:

- XML & database editing
- WYSIWYG word processor-style interface
- Context-sensitive entry helpers
- Complex table handling
- Dynamic form presentation

StyleVision and Authentic include all the functionality listed above and much more.

Visit www.altova.com for more information and to see a Flash demo of StyleVision in action.

Authentic is available under a FREE license on the Altova Web site.

StyleVision is available separately or as part of the Altova MissionKit tool suite, which delivers up to eight Altova XML, database, and UML tools for less than the price of two.*

*Pricing comparison is edition-specific and based on Altova MissionKit vs. individual licenses XMLSpy and MapForce.
