Altova MobileTogether
1 Altova MobileTogether

For Windows Phone

- Downloading and starting the MobileTogether app
- Setting up and connecting to a MobileTogether Server
- The Solutions and Favorites pages
- Running a solution
- The Settings page
- The Server Settings form
- MobileTogether app license agreement

---

Downloading and starting the MobileTogether app

1. Download and install the MobileTogether app from the Altova website or Windows Store.
2. To start MobileTogether, tap the MobileTogether icon on your device's homescreen or in its apps folder.

The MobileTogether app starts and displays the Solutions page.

---

Setting up and connecting to a MobileTogether Server

1. Tap the More (Three Dots) icon on the screen and select Servers.
2. Tap the Add icon at the bottom of the screen (it's a circle with plus symbol in it). A new entry, Unnamed Server, appears and is selected.
3. Tap Unnamed Server. This displays the server's configuration form.
4. Complete the fields of the form by tapping into a field and entering the required data.

- Name: The name by which the server will be known on your device
- Address: The fully qualified domain name (FQDN) or IP address of the MobileTogether Server
- Port: The server port on which MobileTogether Server is available. MobileTogether Server defaults are 8083 for HTTP, and 8084 for HTTPS
- SSL: SSL can be used if this has been set up on the MobileTogether Server. The setting up of SSL is described in the MobileTogether Server documentation.
- User name: The MobileTogether Server user account to use when the client connects to the server. If none has been assigned to you by your MobileTogether Server administrator, use anonymous
- Save Password: The password you enter in the next field can be saved by switching this option to On. (If you use a domain account to log in, password saving might not be enabled. Consult your MobileTogether administrator in this case.)
- Password: The password of the MobileTogether Server user account. If anonymous is the user name, no password is required. The Show Password option allows you to see the
password characters

5. To save the server settings, tap the Back button on your device when you finish with the last field. This takes you to the Solutions page. The added server will be listed there.

Table of Contents

The Solutions and Favorites pages
It is the Solutions page that is displayed when you start the MobileTogether app. The Solutions page shows all the solutions that have been transferred from the currently selected MobileTogether Server to the mobile device. To change the currently selected MobileTogether Server, tap More (Three Dots) | Servers to go to the Servers page, and then select another MobileTogether Server from the Servers page.

The Favorites page contains solutions of the currently selected MobileTogether Server that have been defined as favorites. To define a solution as a favorite, go to the Solutions page, press the solution, and, in the menu that is displayed, tap the Add to favorites option. Both pages (Solutions and Favorites) have two icons at the bottom of the page: a Refresh icon and a More icon.

Table of Contents

Running a solution
On the Solutions or Favorites page, tap a solution to run it on your device.

Table of Contents

The Settings page
To access the Settings page, tap More and select Settings. The Settings page has two sections: General and Servers.

General Settings

- List solutions with details: Displays a descriptive text below the solution name on the solutions page.
- Reload solutions on app start: Reloads all the solutions from the connected server whenever the app is started.

Servers
This section contains a list of MobileTogether Servers that have been set up on the mobile device. Tapping a MobileTogether Server name opens the Server Settings form of that MobileTogether Server. The Servers page has two toolbar icons (at the bottom of the page):
• **Add Server:** Indicated by a plus-symbol icon, it adds a new server to the list and opens the Server Settings form of that server.
• **Delete Server:** Indicated by a dustbin icon, it deletes the selected server.

**Go back to Solutions/Favorites page**
To go back to the Solutions/Favorites page from the Settings page, tap the Back key.

---

**The Server Settings form**
The Server Settings page contains the settings to connect to a MobileTogether Server. Its fields are listed below. When inside a field, tap **Next** to go to the next field. Tap the **Back** button when you finish with the last field. The server will be added to the list of servers, the mobile device will connect to the MobileTogether Server, and solutions for the user specified in the server settings will be downloaded to the mobile client.

- **Name:** The name by which the server will be known on your device
- **Address:** The fully qualified domain name (FQDN) or IP address of the MobileTogether Server
- **Port:** The server port on which MobileTogether Server is available. MobileTogether Server defaults are 8083 for HTTP, and 8084 for HTTPS
- **SSL:** SSL can be used if this has been set up on the MobileTogether Server. The setting up of SSL is described in the MobileTogether Server documentation.
- **User name:** The MobileTogether Server user account to use when the client connects to the server. If none has been assigned to you by your MobileTogether Server administrator, use anonymous
- **Save Password:** The password you enter in the next field can be saved by switching this option to On. (If you use a domain account to log in, password saving might not be enabled. Consult your MobileTogether administrator in this case.)
- **Password:** The password of the MobileTogether Server user account. If anonymous is the user name, no password is required. The Show Password option allows you to see the password characters
