

StyleVision – Graphical Stylesheet Designer

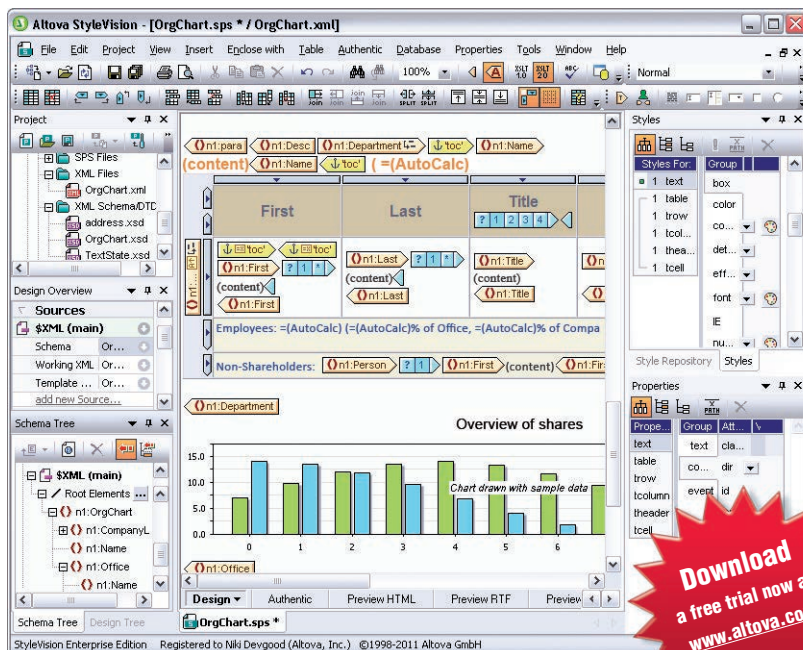

Altova® StyleVision® 2012 is an award-winning business intelligence tool for generating stylesheets, reports, and electronic forms from a wide variety of sources.

StyleVision provides advanced support for transforming XML, XBRL, and database content into HTML, PDF, Microsoft® Word 2007+, and Authentic® e-Forms, enabling users to design professional decision support resources with powerful features such as dynamic data, modular templates, charts, and more.

StyleVision's unique drag-and-drop design interface allows designers and developers to apply graphical designs to their data for simultaneous publication to multiple formats. Advanced entry helper windows and intuitive functionality take the complexity out of stylesheet design and report generation. Templates can be based on XML Schema/DTD, XBRL taxonomy, or database structures, or laid out initially like common desktop publishing applications with source files referenced later.

- Advanced business report design based on XML, XBRL, and database sources
- True electronic forms design through absolute positioning & background image support
- Multichannel publishing in HTML, RTF, PDF, Word 2007+, & Authentic e-Forms
- Charts and graphs as design elements
- Multi-page layouts
- Importing existing XSLT files
- Support for CSS (incl. CSS3), HTML5, and JavaScript
- Inline HTML, XSLT, or XSL:FO processing commands
- Combining multiple XML / XBRL / database sources in one design
- Database query window with SQL editor
- Scripting & toolbar editor for Authentic
- Visual Studio® & Eclipse integration
- Visual, drag & drop XSLT/XSL:FO stylesheet design

StyleVision Design Interface

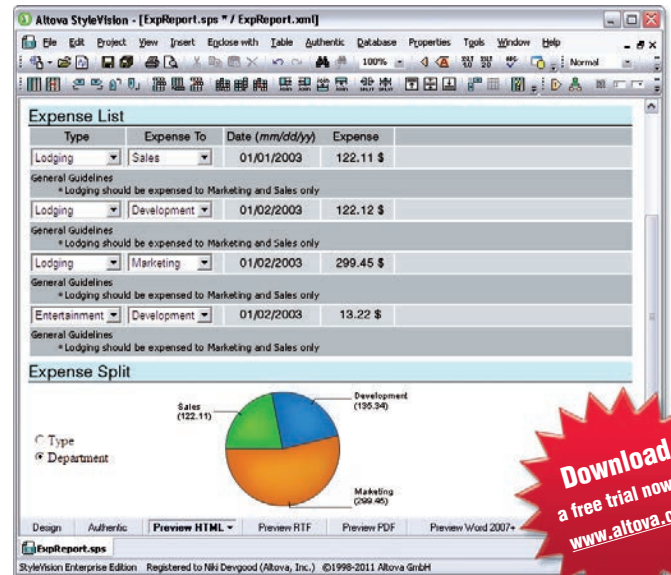

Stylesheet Designer

- Drag & drop interface with intelligent entry helpers
- Design based on XML, XBRL, and/or database source(s)
- User-defined templates
- CSS (incl. CSS3), HTML5 & JavaScript
- Advanced stylesheet functions
- Multichannel output: HTML, Word, PDF, e-Forms

Reporting Tool

- Visual report design for XML, XBRL, and database content
- Dynamic reporting for variable data with consistent formatting
- Charting and graphing support
- Flexible design process
- Multichannel output: HTML, Word, PDF, e-Forms
- Support for all major databases

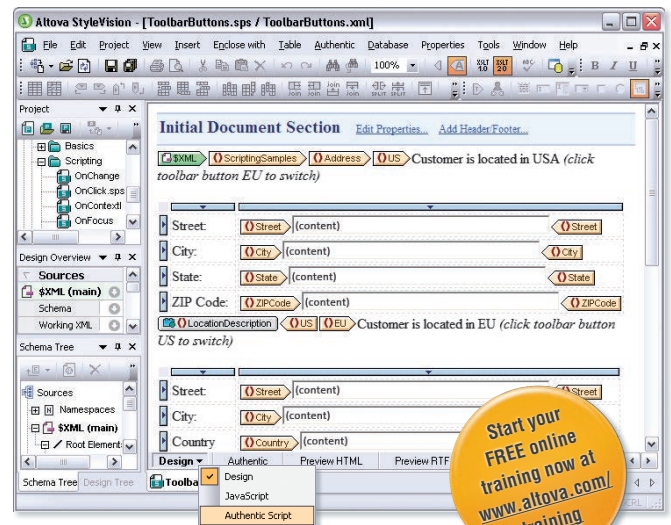

Authentic® – Electronic Forms

e-Forms designed in StyleVision allow non-technical users to efficiently update data in the Authentic XML and database content editor. StyleVision & Authentic provide:

- Form design and editing for XML and databases
- WYSIWYG word processor-style interface
- Context-sensitive entry helpers
- Complex table handling
- Dynamic form presentation
- Interactive form design for data entry applications

StyleVision and Authentic include all the functionality listed above and much more.

Visit www.altova.com for more information, Flash demos, and free online product and technology training.

StyleVision is available separately or as part of the Altova MissionKit, the integrated suite of XML, database, and UML tools that includes eight products for less than the price of two.*

*Pricing comparison is edition-specific and based of Altova MissionKit vs. individual licenses XMLSpy and MapForce.
