

Altova's XMLSPY, the Industry Standard XML Editor for Java Developers to be showcased at JavaOne

Beverly, MA, June 9, 2003 – Altova Inc. (<http://www.altova.com>), producer of XMLSPY 5, the world's leading XML development environment, will be exhibiting for the first time at JavaOne San Francisco, the official Sun Microsystems Java Developer Conference. The exposition hall is located at the Moscone Convention Center in San Francisco from June 10-12 in booth number 1442.

The XMLSPY 5 Development Environment, recent winner of Java Developer Journal's Readers Choice Award for 'Best XML Editor', is a powerful tool for Java developers to model, develop, test and debug any XML technologies in conjunction with their current Java or J2EE development environment, enhancing developer productivity and time-to-market of XML and Java based applications. The combination of Java and XML technologies enables both platform and application data portability.

To celebrate Altova's inaugural participation with the JavaOne Conference, Altova will be running a special contest - Altova will be distributing a total of 1500 special XMLSPY T-shirts at the Altova Booth (#1442). Every other hour during regular exhibit hall hours, an authorized Altova representative will randomly give away a free software license for XMLSPY 5 Professional Edition, valued at \$399.00 (USD), to any exhibit hall guest spotted wearing one of the special XMLSPY t-shirts. Complete contest details are available at the Altova booth.

The XMLSPY 5 XML Development Environment includes features for working with XML and Java, including support for XML Schema-to-Java code generation (targeting the Industry-standard Java API for XML Parsing [JAXP], Forte for Java, and Apache Ant), and a new graphical WSDL editor ideally suited for modeling Java Web Services. Partnerships with Java industry giants: BEA, Oracle and IONA, ensure that applications developed using XMLSPY can be easily used in conjunction with the industry leading Java platforms and servers.

About Altova

Altova, Inc. is a leading provider of XML software solutions with offices in Beverly, MA and Vienna, Austria.
