

## **XMLSPY 5 Release 4 Japanese Edition Now Available from Toshiba IT Solutions Corporation**

### **New Japanese Edition solidifies International Customer Base of XMLSPY 5.**

Beverly, MA, June 17, 2003. – Altova Inc. ([www.altova.com](http://www.altova.com)), producer of XMLSPY, and Toshiba IT Solutions Corporation, today announced XMLSPY 5 Release 4 is now available in a translated Japanese edition, including updated product documentation and website. Toshiba IT Solutions Corporation, the authorized distributor of localized versions of Altova's XML software products in Japan, specializes in system integration and support for the Japanese enterprise environment.

XML technologies are today widely used as a key enabling technological innovation, breaking down the barriers to International eCommerce to achieve globally integrated business systems. The Japanese version of XMLSPY 5 Release 4 maximizes software developer productivity for Japanese speaking customers.

XMLSPY 5 Release 4 builds on the success of previous award winning versions through the addition of several key new features. XMLSPY 5 and AUTHENTIC 5 now support Delta-V (<http://www.webdav.org/deltav/>), an extension to the WebDAV protocol which enables check-in/check-out functionality when used in conjunction with a WebDAV server, thus supporting XML content editing in a truly collaborative, distributed environment, such as the Web. The Stylesheet Designer now includes support for direct usage of global templates, support for conditional statements in Stylesheet Designer, as well as support for PDF Header/Footer/Cover pages, thus allowing for more customized template layouts and content outputs. The XMLSPY code generator now supports output code which uses Xerces (a popular XML parser), Standard Template Library (STL), and additional support of XML Schema simple types in Java/C# code generation.

The Japanese version of XMLSPY 5 Release 4 is available immediately for free trial download at [www.xmlspy.jp](http://www.xmlspy.jp).

### **Pricing and Availability**

The Japanese version of XMLSPY 5 Release 4 is available immediately for free trial download and purchase at <http://www.toshiba-it.co.jp/xml/download/index.html>.
