

FOSE 2006 BOOTH #500

Altova to Showcase XML, Data Management, UML, and Web Services Tools at FOSE 2006

BEVERLY, Mass., March 1, 2006 – Altova® (www.altova.com), creator of XMLSpy® and other leading XML, data management, UML, and Web services tools, today announced that it will showcase the latest version of its product line next week at the FOSE 2006 government technology conference in Washington D.C. from March 7-9. Altova XMLSpy, the industry standard XML development environment, was awarded the Best of FOSE Award in the Desktop Systems Software category at last year's event. The awards program recognized the most innovative and well-designed products in the government IT market.

At this year's conference, Altova engineers will conduct live product demonstrations of XMLSpy in Booth #500, as well as other Altova software products, including the Altova MapForce data integration and Web services implementation tool, and Altova UModel Unified Modeling Language (UML) design tool. Altova's diverse, award-winning family of software tools increases the productivity of software developers and lowers organizations' total cost of ownership for related applications and technologies. All Altova products feature an intuitive visual user interface and an array of powerful, yet easy-to-use, features that simplify application development and data management projects.

FOSE 2006 is the premier technology event for federal, state, and local government professionals. The 30th annual conference will be held at the Washington, D.C. Convention Center where 20,000 government technology professionals will hear an arsenal of ideas from keynote speakers, and attend educational forums and high tech demonstrations. For more information about FOSE 2006 and free registration for government and military professionals, visit: www.fose.com.

About Altova

Altova accelerates application development and data management projects with software and solutions that enhance productivity and maximize results. As an innovative, customer-focused company and the creator of XMLSpy and other leading XML, data management, UML, and Web services tools, Altova is the choice of over 2 million clients worldwide, including virtually every Fortune 500 company. Enabling customers ranging from vast development teams in the world's largest organizations to progressive one-person shops, Altova's line of software tools fulfills a broad spectrum of business needs. Altova is an active member of the World Wide Web Consortium (W3C) and Object Management Group (OMG) and is committed to delivering standards-based platform-independent solutions that are powerful, affordable, and easy to use. Altova was founded in 1992 and has headquarters in Beverly, Massachusetts and Vienna, Austria. Visit Altova on the Web at www.altova.com.
