Altova MobileTogether

1 Altova MobileTogether

For Web Client

Log in to MobileTogether Server
Run a solution

Current version: 1.3

Log in to MobileTogether Server

1. Open a web browser.
2. In the browser's address bar, enter the address of the MobileTogether Server to which you wish to connect and the port that has been configured as the server's mobile client port. For example, if you are connecting to a MobileTogether Server on your own machine and that server is using the default client port settings, enter: `localhost:8083` in the address bar of your browser.
3. Sign in directly with the user name and password that has been assigned to you by your MobileTogether Server administrator. If you have not been assigned one, then use `anonymous` as your user name; no password is required for `anonymous`.
4. A successful login takes you to the root container (`Container /`), which contains all the solutions deployed to that server.

Table of Contents

Run a solution

1. After logging in to MobileTogether Server, navigate to the solution you want to run.
2. Run the solution by clicking/tapping the solution's link in its *Run in Browser* column.
3. If a solution was run previously and had data saved, then the **Clear Saved Data** button is displayed for that solution. If you wish to run the solution with the original unchanged data, then click/tap **Clear Saved Data**. If you do not clear saved data, then the solution will start with the data that has been previously saved.
4. After you have finished, log out by clicking/tapping **Log out** at the top right of the screen.

Note: Data that is saved on the web client is saved in the local storage (aka web storage) of your browser. HTML 5.0 local storage is supported in the following browsers:

IE 8.0+	Firefox 3.5+	Safari 4.0+	Chrome 4.0+	Opera 10.5+	iPhone 2.0+	Android 2.0+
