1. Altova MobileTogether 3

Index 0
Chapter 1

Altova MobileTogether
Downloading and starting the MobileTogether app

1. Download and install the MobileTogether app from the Altova website or Google Play Store.
2. To start MobileTogether, tap the MobileTogether icon on your device's homescreen or in its apps folder.

The MobileTogether app starts and displays the Solutions page.

Setting up and connecting to a MobileTogether Server

1. Tap the Menu (or Options) key on your device and select Settings.
2. In the toolbar (at the top of the Settings page), tap Add Server (the plus-symbol icon). This displays the Server Settings page.
3. Complete the fields of the Server Settings page. When inside a field, tap Next to go to the next field. Tap Done when you finish. The fields are, in display order:

- **Name**: The name by which the server will be known on your device
- **Address**: The fully qualified domain name (FQDN) or IP address of the MobileTogether Server
- **Port**: The server port on which MobileTogether Server is available. MobileTogether Server defaults are 8083 for HTTP, and 8084 for HTTPS
- **Use SSL**: SSL can be used if this has been set up on the MobileTogether Server. The setting up of SSL is described in the MobileTogether Server documentation.
- **User name**: The MobileTogether Server user account to use when the client connects to the server. If none has been assigned to you by your MobileTogether Server administrator, use anonymous
- **Password**: The password of the MobileTogether Server user account. If anonymous is the user name, no password is required. The Show Password option allows you to see the password characters
Login: You can access a server directly by using the login name/password of a MobileTogether Server user account. Some servers additionally allow the users of specific domains to log in with their domain logins. If this is the case, then the allowed domains are listed as options for this setting. Select the domain you want, and then enter your domain login details (name and password) in the respective fields.

Save Password: The password that you enter can be saved by switching this option to On. (If you use a domain account to log in, password saving might not be enabled. Consult your MobileTogether administrator in this case.)

4. To save the server settings, tap Done after finishing with the Password field.
5. Tap the Back key of the device to return to the Settings page. The added server will be listed there.

Table of Contents

The Solutions, Running, and Favorites pages
You can switch between these three pages (Solutions, Favorites, and Running) by clicking their respective buttons.

The Solutions page
The Solutions page shows all the solutions that have been transferred from the currently selected MobileTogether Server to the mobile device. To change the currently selected MobileTogether Server, tap the Server Management toolbar icon, and select another MobileTogether Server from the list that appears.

The Running page
Some solutions are designed to keep running in the background after you start another solution. These running solutions (from all servers to which the client is connected) are displayed on the Running page. To close a running solution, press that solution's icon, and, in the menu that appears, tap Close solution. Note that when you install a new version of the MobileTogether app, all running solutions are closed.

The Favorites page
The Favorites page contains solutions of the currently selected MobileTogether Server that have been defined as favorites. To define a solution as a favorite, go to the Solutions page, press the solution, and, in the menu that is displayed, tap the Add to favorites option.

Toolbar icons
Each page (Solutions, Favorites, and Running) has three toolbar icons at the top of the page:

- Select Server: This is a menu icon (or spinner) that allows you to select a server from the added servers list. Solutions from the selected server are displayed in the Solutions/Favorites page.
- Reload Solutions: Tapping this icon causes the solutions of the currently selected server to be reloaded.
- Main menu: Displays a menu with the following items:
  + Settings, which links to the Settings page
  + Documentation, which links to the MobileTogether Client help page on the Altova website
Go to the Settings page
To go to the Settings page from the Solutions/Favorites page, tap the Menu (or Options) key on your device and select Settings.

Exit the MobileTogether app
To exit the MobileTogether app, tap the Back key.

Table of Contents

Running a solution
On the Solutions or Favorites page, tap a solution to run it on your device. On the Running page, select a solution to continue working with it.

Table of Contents

The Settings page
To access the Settings page, tap the Menu (or Options) key on your device and select Settings. The Settings page has two sections: General Settings and Added Servers.

General Settings
- List solutions with details: Displays a descriptive text below the solution name on the solutions page.
- Reload solutions on app start: Reloads all the solutions from the connected server whenever the app is started.

Servers
This section contains a list of MobileTogether Servers that have been set up on the mobile device. Tapping a MobileTogether Server name opens the Server Settings form of that MobileTogether Server. You can edit server settings even when a solution is running; however, all running solutions will be closed before any server-setting edits are saved.

Toolbar icons
The Settings page has two toolbar icons (at the top right of the page):
- Add Server: Indicated by a plus-symbol icon. Tapping it takes you to the Server Settings page, in which you can define the settings of a new MobileTogether Server to connect to. The procedure is described in the section, Setting up and connecting to a MobileTogether Server.
- Delete Server: Indicated by a dustbin icon. Tapping it displays the Select Server to Delete dialog, which lists all the added MobileTogether Servers. Tap the MobileTogether Server you want to delete.
The Server Settings page
The Server Settings page contains the settings to connect to a MobileTogether Server. It is accessed from the Settings page in two ways:

- **To add a new server**: Tap the Add Server (plus-symbol icon) in the Settings page toolbar.
- **To edit an added server's settings**: In the list of servers under Added Servers, tap a server name.

The fields of the Server Settings page are listed below. When inside a field, tap **Next** to go to the next field. Tap **Done** when you finish with the last field. The server will be added to the list of servers on the Settings page, the mobile device will connect to the MobileTogether Server, and solutions for the user specified in the server settings will be downloaded to the mobile client. If a solution is running, you will be asked whether you want to close all running solutions and save the modified server settings, or whether you want to cancel the server-setting modifications.

- **Name**: The name by which the server will be known on your device
- **Address**: The fully qualified domain name (FQDN) or IP address of the MobileTogether Server
- **Port**: The server port on which MobileTogether Server is available. MobileTogether Server defaults are 8083 for HTTP, and 8084 for HTTPS
- **Use SSL**: SSL can be used if this has been set up on the MobileTogether Server. The setting up of SSL is described in the MobileTogether Server documentation.
- **User name**: The MobileTogether Server user account to use when the client connects to the server. If none has been assigned to you by your MobileTogether Server administrator, use **anonymous**
- **Password**: The password of the MobileTogether Server user account. If **anonymous** is the user name, no password is required. The **Show Password** option allows you to see the password characters
- **Login**: You can access a server directly by using the login name/password of a MobileTogether Server user account. Some servers additionally allow the users of specific domains to log in with their domain logins. If this is the case, then the allowed domains are listed as options for this setting. Select the domain you want, and then enter your domain login details (name and password) in the respective fields.
- **Save Password**: The password that you enter can be saved by switching this option to **On**. (If you use a domain account to log in, password saving might not be enabled. Consult your MobileTogether administrator in this case.)

**Toolbar icons**
The Server Settings page has two toolbar icons (at the top right of the page):

- **Save Settings**: Indicated by a disk icon. Tapping it saves the server settings.
- **Delete Server**: Indicated by a dustbin icon. Tapping it displays a dialog asking whether you want to delete the server. Tap **Yes** to delete, **No** to cancel.
Troubleshooting

- **MobileTogether protocol in email applications:** At the time of writing (April 2016), links that use the mobiletogether:// protocol do not work in Gmail and some other email applications, but they work perfectly in popular email applications such as AquaMail, K9, and MailWise. They have been tested in AquaMail and K9, and work correctly in these applications. The mobiletogether:// protocol is used for MobileTogether-specific tasks such as opening a MobileTogether solution via the link or updating the server settings on your client device via the link.

- **Scrollable tables limitation on Android 4.x devices:** If there are two or more (scrollable or non-scrollable) tables on a page, then, if any of these tables is scrollable, it cannot be scrolled vertically. Either upgrade to a later Android version, or contact your MobileTogether administrator.
